Fort Saskatchewan has been a driving force in industrial innovation for over six decades. The City supports major operations with essential production, maintenance, and supply chain solutions across a range of sectors. As part of Alberta's Industrial Heartland, the region is experiencing a wave of investment and expansion - anchored by Dow's \$11.6 billion Path2Zero project and more than \$40 billion in commitments from over 40 leading companies.

Canada's Premier Petrochemical Hub

Major Projects in Alberta's Industrial Heartland

DOW'S Path2Zero Expansion

Dow is building the world's first net-zero facility, which will produce 3.2 million metric tonnes of polyethylene and ethylene derivatives. The project will also upgrade its existing facility to achieve net-zero carbon emissions. The project is expected to create 8,000 jobs during construction and employ 500 people once operational. The facility is anticipated to be completed by 2029.

Carbon Trunk Line Expansion

The Alberta Carbon Trunk Line (ACTL), owned by Wolf Midstream, is the world's largest carbon capture and storage project. It consists of 240 km of pipeline which collects, compresses, and stores up to 14.6 million tonnes of CO₂ annually. Construction is underway on a 40-km extension through the Heartland, which will be capable of handling an additional 7 million metric tonnes of CO₂ per year once completed.

Atlas Carbon Storage Hub

The Atlas Carbon Storage Hub will be a multi-phased, open access hub developed, owned and operated in partnership between Shell Canada and ATCO EnPower. The Hub will provide customers in the area with transportation and sequestration services for CO₂ emissions. The first phase of the project is planned to be operational by 2028.
